

## COMMITMENTS FOR ACTION AND DELIVERABLES AS INCLUDED IN THE DECLARATION OF THE CIRCULAR PLASTICS ALLIANCE

<i>Deadline</i>	<b>Design</b>	<b>Collection&amp; Sorting</b>	<b>Recycled content</b>	<b>R&amp;D and investments</b>	<b>Monitoring</b>
<b>03/2020</b>	Work plan on design guidelines and standards			R&D agenda on circular plastics	
<b>06/2020</b>		State-of-play on collected and sorted plastic waste			
<b>01/2021</b>	Overview of current status of production of recycled plastics; identify untapped potential for more recycling; map investment needs in recycling facilities in each MS	Identify untapped potential for collection and sorting Map investments needs in collection and sorting facilities and infrastructures in each MS	Identify legal, economic and technical obstacles to more uptake of recycled plastics	Map investments needs in collection, sorting, recycling and converting of plastics, and list the barriers	Set up a monitoring system covering: 1) collected and sorted waste 2) recycling inputs and outputs 3) converting inputs and outputs
<b>All along</b>	<ul style="list-style-type: none"> <li>• Develop, update or revise design guidelines</li> <li>• Contribute to update CEN and industry standards on recyclability</li> </ul>	<ul style="list-style-type: none"> <li>• Participate in information and awareness raising campaigns</li> <li>• Work with all actors on effective framework for separate collection of all plastic waste</li> <li>• Develop standards to assess the quality of sorted plastic waste</li> </ul>	<ul style="list-style-type: none"> <li>• Increase uptake to 10 million tonnes</li> <li>• Work with all actors to create the right conditions</li> <li>• Support the development or revision of standards and guidelines on the quality of plastics recycling and recycled plastics</li> <li>• Communicate the positive value of plastics in a circular economy</li> </ul>
